

New plants from Denmark
2010

www.floradania.dk

Argyranthemum Frutescens Tendenza® 'My Daisy'

Rohde's has developed a new *Argyranthemum Frutescens*, called Tendenza® 'My Daisy', with the objective of using fewer chemicals. Tendenza® My Daisy has a broad, uniform growth and a long lifetime.

Grower: Rohde's A/S – www.rohdes.dk

Aster hybrid Mystery Lady® Supreme 'Marlene'

'Marlene' is a new plant for the 2010 season. It has strong, dark green serrated leaves and a large, blue full flower. It can be made with a single cutting in a 10-11 cm pot.

Grower: Råhøj - www.rahoj.dk

Campanula Little Blue Ocean^(N)

Is the outcome of several years of close co-operation between Carlsberg Research Center and Gartneriet Thoruplund. *Campanula Little Blue Ocean^(N)* is a completely new variety of the Ocean series. It will be grown for test in spring 2010. The flowers and also the plant itself are a little smaller than Blue Ocean.

Grower: Thoruplund – www.thoruplund.dk

Campanula portenschlagiana 'Dark Royal'

Dark Royal has closely spaced buds and small flowers. The colour is intense deep lilac.

Grower: Tvillingegaarden – www.50015.dk

Campanula portenschlagiana 'White Royal'

White Royal has numerous long-lived and colour-fast flowers. The plant is compact and has faintly scented flowers.

Grower: Tvillingegaarden – www.50015.dk

Campanula Wild Ocean^(N)

Is the outcome of several years of close co-operation between Carlsberg Research Center and Gartneriet Thoruplund. Campanula Wild Ocean^(N) is a completely new variety of the Ocean series. It will be grown for test in spring 2010. It grows more wildly than other Campanulas, and the foliage is greyish green, a good, striking contrast to the flowers.

Grower: Thoruplund – www.thoruplund.dk

Capsicum Grower Selection 'Hot Carrot'TM

Hot CarrotTM is an impressive new plant from Ex-Plant's comprehensive chili pepper breeding programme. Harmonious habit and a wealth of small, decorative orange fruits. In spite of its innocent appearance, there is every reason to be on your guard: it's really *Hot*. Can be placed outdoors and indoors. Strength: Very Hot

Grower Selection is a new chili pepper series from Ex-Plant A/S, developed to meet the increasing interest for using chili peppers among consumers all over the world.

Supplier: Ex-Plant – www.ex-plant.com

Capsicum grower Selection 'Jalapeno Imp.'

Jalapeno Imp. is a new compact variety of the world's most popular chili pepper. It has a gracious habit and produces many useable fruits during summer. Can be placed outdoors and indoors. Strength: Hot

Grower Selection is a new chili pepper series from Ex-Plant A/S, developed to meet the increasing interest for using chili peppers among consumers all over the world.

Supplier: Ex-Plant – www.ex-plant.com

Capsicum Growers Selection 'Snack Pepper'™

Snack Pepper™ is a mild, child-friendly pepper plant; it is not only decorative, but it also produces numerous crisp and sweet fruits throughout summer. The more fruits you harvest, the more the plant actually produces. Can be placed outdoors and indoors. Strength: Mild

Grower Selection is a new chili pepper series from Ex-Plant A/S, developed to meet the increasing interest for using chili peppers among consumers all over the world.

Supplier: Ex-Plant – www.ex-plant.com

Chirita tamiana

The nursery Kærby now produces a genus that originates from Asia. A spectacular new plant with beautiful, decorative Streptocarpus-like flowers and Saintpaulia-like foliage. The plant is sturdy, but does not tolerate direct sunlight. Water and feed only a little. A trendy plant which will win the hearts of consumers all over Europe.

Grower: Kærby – www.livingcolours.dk

Clematis Tai Yang™ Boulevard™ Evipo045^(N)

Strong compact free flowering early large flowered cultivars. These medium-sized flowered clematis also have a repeat flowering. These are ideal for growing indoors as pot plants or outdoors in containers. Can be placed on the patio or deck garden and are must for small town or city gardens and balconies. They are healthy and hardy in most climate zones.

Grower: Poulsen Roser A/S – www.poulsenroser.com

Dischidia pectenoides

Dischidia pectenoides is a small, spectacular climber. Some of its leaves look like tiny balloons. In nature, the balloon type leaves provide shelter for ants in exchange for carbon dioxide. Dischidia pectenoides thrives in slight shade. The plant does not grow in soil but in a small piece of coconut shell attached to a snail shell. They don't like too much water and misting the plant once or twice a week should do the job. The product is available in a glass.

Grower: Feldborg Tropical Plants A/S – www.feldborg.com

Hibiscus Apollo

A fantastic "summer" Hibiscus developed primarily to attract younger customers. The plant has an enormous ornamental value as a garden plant – in the "second" round of planting. The foliage is so strong that it withstands the Danish summer – with a flower in all the colours of the rainbow, it is certain to bring new life to any garden.

Grower: Graff Kristensen A/S - www.graff.dk

Hibiscus Arion

Arion is the first of a new Hibiscus series with the breeder headline "Hibiscus with a Tulip effect". Hibiscus is usually known for its large, bright flowers that last from 1-6 days (Long Life). Arion has large, beautiful and conspicuous buds that can adorn any home until the flower finally opens after 10-12 days and lasts for 2-3 days.

Grower: Graff Kristensen A/S - www.graff.dk

Hibiscus Cairo Yellow™

Cairo Yellow™ is the most recent plant in the range of Aloha™ Collection 'Singleflower' from Hawaii®. It has a beautiful dark red eye surrounded by a warm yellow crown. Cairo Yellow™ will lighten up any home.

Season: March-September

Grower: Hawaii Gartneriet I/S - www.50298.dk

Hibiscus Nani™ Yellow

Nani™ Yellow is a new plant in the Tropical™ series. Nani™ Yellow has sweeping, warm, yellow petals round a shiny red centre surrounded by dark foliage. This flower will bring sunlight into the living-room.

Grower: Hawaii Gartneriet I/S - www.50298.dk

Hibiscus Surf™

Surf™ is included in the range of multicoloured hibiscus flowers. It has a gentle appearance with its bright inviting colours. Surf™ starts with a dark red centre that radiate out in pink threads on a creamy background to end in a pale yellow edge. It is included in the Special™ Collection series.

Grower: Hawaii Gartneriet I/S, www.50298.dk

Hibiscus Wela™ Red

Wela™ Red is a new plant that completes the Tropical™ Collection series even more. It has a beautiful uniform warm red colour with a touch of bright grains surrounded by glossy dark green foliage.

Grower: Hawaii Gartneriet I/S - www.50298.dk

Kalanchoe Queen® African® RoseFlowers® African Magic^(N)

African Magic^(N) radiates deep cerise from a profusion of rose-shaped flowers atop dark-green leaves. An exotic addition to our African® series.

Grower: Knud Jepsen a/s – www.queen.dk

Kalanchoe Queen® Kalanchoe Originals Clarissa^(N)

Clarissa^(N) is the epitome of classic elegance. Large rose-pink blooms give the plant its airy, fresh appeal.

Grower: Knud Jepsen a/s – www.queen.dk

Kalanchoe Queen® Kalanchoe Originals Helene^(N)

Helene^(N) makes a lasting impression with magnificent, twin-shaded flowers set against lush, verdant foliage. A plant full of vitality.

Grower: Knud Jepsen a/s – www.queen.dk

Kalanchoe Queen® Kalanchoe Originals Ingrid^(N) *New Selection*

Ingrid^(N) *New Selection* is a new, improved variety, distinctive for its richer, warmer yellow hue. Just right for Easter.

Grower: Knud Jepsen a/s – www.queen.dk

Kalanchoe Queen® Kalanchoe Originals Keira^(N)

Keira^(N) lights up your life with snowy white flowers and fresh green leaves. A decorative, long-lasting choice.

Grower: Knud Jepsen a/s – www.queen.dk

Kalanchoe Queen® MoreFlowers® Star^(N)

Kalanchoe Queen® MoreFlowers® is the most recent product group from Queen®. MoreFlowers® is a conspicuous, decorative series consisting of unique flowers with extremely long-lasting ornamental qualities. Queen® MoreFlowers® is MORE: Living, Design, Life, Flower, Joy, Passion, Value, Special, Class, Style, Luxury and Innovation. Queen® MoreFlowers® - LivingDesign!

Star^(N) brings a glow of sunny cheer to any setting with its lasting abundance of bright yellow blooms.

Grower: Knud Jepsen a/s – www.queen.dk

Kalanchoe Queen® RoseFlowers® Cameron^(N)

Cameron^(N) displays a fiery mass of large red blooms that stand in rich contrast to the succulent green foliage. For durability, this is one of the best among the red RoseFlowers®.

Grower: Knud Jepsen a/s – www.queen.dk

Kalanchoe Queen® RoseFlowers® Mira^(N)

Mira^(N) balances small, dark-green leaves with delicate peach flowers, ideal for lighting up a spring day or matching the golden shades of autumn. Characterised by enduring quality.

Grower: Knud Jepsen a/s – www.queen.dk

Kalanchoe Queen® RoseFlowers® Tiffany^(N)

Tiffany^(N) has the look of an old English rose with its unique two-tone petals. A true romantic characterised by soft pink shades and lustrous dark leaves.

Grower: Knud Jepsen a/s – www.queen.dk

Kalanchoe Queen® WildFlowers® Romantic Orange^(N)

Queen® WildFlowers® are wild, sculptural pot flowers grown in a way that respects nature and created with a great passion for easy pot flowers. WildFlowers® are living bouquets with excellent decorating qualities both indoors and outdoors. Their succulent leaves make the bouquet extremely long-lived. A series of renewals. Queen® WildFlowers® - A living bouquet!

Romantic Orange^(N) has the soft, feminine look that means romance is in the air. Glossy, dark-green leaves on slender stems offset the orange rose-like flowers with a flame-red centre.

Grower: Knud Jepsen a/s – www.queen.dk

Nematanthus 'Australis'

The Lindvig Greenhouse nursery found this new plant in the home of a Brazilian collector of Nematanthus. A compact plant with narrow leaves and lemon yellow flowers that bloom easily and for a long time when the plant is allowed to spend winter in a bright indoor place. Produced in 11 cm clay pots.

Grower: Lindvig – www.lindvig.dk

Osteospermum Dalina® Leona

Bright yellow, prolifically flowering and quickly produced variety.

Grower: Dalina ApS - www.dalina.dk

Osteospermum Dalina® Olympia

White with a blue eye. Prolifically flowering variety with excellent growing qualities.

Grower: Dalina ApS - www.dalina.dk

Osteospermum Dalina® Tosca

Bronze black, prolifically flowering and quickly produced variety.

Grower: Dalina ApS - www.dalina.dk

Oxalis brasiliensis

Comes from South America – Brasil. Oxalis brasiliensis flowers from mid to late spring, with sparkling bright Lilac flowers, on top of dark green foliage. Oxalis brasiliensis deserves to be in ever rock garden. Plant it in well drained soil, in full sun to part shade. Oxalis brasiliensis also makes a good container plant as well as a very good garden performer.

Grower: Råhøj – www.rahoj.dk

Oxalis pes-caprae var. Pleniflora 'Yellow double'

Comes from South Africa – Cape town Oxalis pes-caprae 'double' has a beautiful rich yellow double flower. The buds and the upper part of the flowering stalks has a copper brown colour. The leaves are divided into 3 round heart-shaped leaflets, arranged in a whorl with all the leaflets of roughly equal size.

Grower: Råhøj – www.rahoj.dk

Oxalis purpurea 'Ken Aslet'

Comes from South Africa It grows high up in the mountains. Oxalis purpurea flowers from September and last through most of Winter. It has a large bright yellow flower, with a marvellous foliage plant and deserves to be in every rock garden.

Grower: Råhøj – www.rahoj.dk

Rhipsalidopsis Cherokee Spirit ^(N)

A new three-coloured product, produced in 9 cm

Grower: Rhode's A/S – www.rohdes.dk

Rhipsalidopsis Cheyenne Spirit ^(N)

Improvement of the existing colour, with a neater plant form and flower.

Grower: Rhode's A/S – www.rohdes.dk

Grower: Rhode's A/S – www.rohdes.dk

Rhipsalidopsis Pawnee Spirit^(N)

Improvement of the existing colour, with a neater plant form and flower.

Grower: Rhode's A/S – www.rohdes.dk

Rosa hybrid Belami Kordana®

Another more remarkable, elegant pot rose can be added to the wide Kordana® range. With its unique long-lasting qualities and incredibly beautiful flower, Belami Kordana® will undoubtedly be well received on the market. The colour of the large well-shaped flower is primarily cream, ranging from slightly golden to delicate rose. The bushy foliage adds harmony to this perfect Kordana® pot rose.

Grower: Rosa Danica A/S – www.rosa-danica.dk

Rosa hybrid Gigi™ Party® Poultty019^(N)

PARTY® roses are miniature versions of PARADE® roses and are found in a wide range of colours. They have large rosebuds and are usually grown in 5 to 6 cm pots to an overall height of 12 to 14 cm. They will fit in everywhere in the house and are well suited for use on the windowsill and are especially ideal for table decorations. Place a Party® rose next to each plate, and they will make a well provided table even more beautiful!

Grower: Rosanova A/S – www.rosanova.com

Rosa hybrid Marika™ Parade® Poulpar081^(N)

The PARADE® roses are available in all colours and are grown in 8-11 cm pots to an overall height of 27-29 cm. Use PARADE® roses singly or a few together in a basket indoors, or see them thrive in the winter garden, on the terrace, or planted out in the beds! The PARADE® roses have large rosebuds and produce a large number of flowers per plant. They can endure a certain amount of drying out before losing buds. All the varieties have a long keeping quality.

Grower: Rosanova A/S – www.rosanova.com

Rosa hybrid Petaya™ Hit® Poulpah065^(N)

Roses in the PATIOHIT® collection are compact and bushy plants and are very resistant to diseases. They have large flowers and very large rosebuds in strong colours. As the name suggests, these roses are especially suited to be placed on the patio in large pots or tubs. Used in the house, the PATIOHIT® roses look fantastic as a single pot plant or 3 together in a basket on the floor. They can endure a certain amount of drying out before losing buds. All the varieties have a long keeping quality.

Grower: Rosanova A/S – www.rosanova.com

Rosa hybrid Piazza Fortuna™ Forever®

The rose breeder Rosa Eskelund has once again bred an incredibly beautiful, well-shaped rose with shiny, glossy foliage. Piazza Fortuna is the square of happiness and this rose will bring lots of happiness and joy wherever it is placed, especially in garden containers and beds. Planting out: May - September. Winter-hardy. Ready for sale from March 2010

Grower: ROSA ApS – www.rosa.dk

Rosa hybrid Santa Barbara™ Forever®

Santa Barbara™ Forever® is a unique and different rose. It has a beautiful, intense pink colour – a true “eye-catching” colour, and extremely long-lived flowers. All the flowers in the same cluster will flower and form an abundant globe of flowers. Once again, Roses Forever creates tradition of the untraditional with Santa Barbara™ Forever®.

Well suited to be planted out in garden containers and beds. Planting out: May - September. Winter-hardy
Ready for sale from March 2010

Grower: ROSA ApS – www.rosa.dk

Rosa hybrid Sunstar Kordana®

The intense yellow colour that characterises Sunstar Kordana® forms a strong contrast to its dark glossy foliage. The well-shaped bushy flower gives the plant a harmonious appearance calling a refreshing spring day to mind. Uniform and even flowering makes Sunstar Kordana® ideal for many purposes. And when it comes to long-lasting qualities, Kordana® are among the very best.

Grower: Rosa Danica A/S – www.rosa-danica.dk

Rosa hybrid Wilanov™ Palace® Poulpal050^(N)

Bushy and compact polyantha roses. This type of rose has large, double flowers and will bloom continuously during summer. They make good cut flowers and these varieties have a rose scent. PALACE® roses are very suitable for indoor use and are ideal for pots and tubs outside. All varieties have Long Decorative Value™.

Grower: Rosanova A/S – www.rosanova.com

Sagina med Salix

Two species combined; they differ so much in size and habit in nature that it is hard to imagine them together as a small pot plant. But by using Salix cuttings together with Sagina, which is the plant that resembles grass the most without actually being grass, a product is produced that reminds you about the spring to come with a lovely green lawn and a small tree which have just unfolded its tender leaves.

Since both species are well suited to be planted out in the garden when spring has arrived and the sun has again taken over, Sagina with Salix spreads double joy in that it can first be used as a house plant and then as a small new tree in the garden.

Grower: Lundegaard – www.50488.dk

Saint paulia ionantha 'Wendy'

The flower has a stylish pink colour with a lilac edge.

Grower: Kærby ApS – www.livingcolours.dk

Senecio cruentus-hybrid POLARIS® 'Red'

POLARIS® 'Red' is a new variety in the well-known Polaris series. It is characterised by an extremely harmonious habit and beautiful dark green foliage. The numerous velvety and Bordeaux flowers create a fine contrast to the yellow stamens.

Supplier: Ex-Plant – www.ex-plant.com

Wasabia japonica

Wasabia japonica is an edible plant. It is an Asian herb which can be used for salads or boiled in soy sauce. It is part of Stendemose's concept: Tasty Plants.

Grower: Stendemose – www.stendemose.dk
