

## Tips & Ideas

### Buttercups in a cylindrical glass vase

Create a simple and elegant spring decoration with buttercups. This decoration, which uses several vases in a row, will delightfully embellish a window-sill, a dividing wall or a kitchenette, the clean, smooth surfaces of which provide a fine setting for a piece of living nature in the home.

The decoration shown here was made with a tall, slim cylindrical glass vase 25-30 cm high, but a smaller vase would also be suitable, and would give the same view of the soil base.

How to do it – step by step:

- Take the plants out of the pot.
- Wind some yarn around the lump of earth, so that it remains visible, but is now decorated.
- Tie a knot to hold it in place.
- Carefully place the plant in the vase.
