

Tips & Ideas

Spring atmosphere in bright colours

Pink is often used as a contrasting colour, but here it appears with green in a cheeky spring decoration with geraniums, which can be used outdoors or indoors.

- Plant two geraniums in a pot cover in a bright colour. Here we have used a green bowl which goes well with the colour of the flowers
- Use thick yarn to create wholeness and form between the leaves and flowers
- Decorate with paper clips in various colours, which also help to keep the yarn in place
